Exemple de main :

```
//MyForm.cpp  
#include "MyForm.h"
```

```
using namespace System;  
using namespace System::Windows::Forms;
```

```
[STAThreadAttribute]  
int __cdecl WinMain(array<String^>^ args )  
{  
    Application::EnableVisualStyles();  
    Application::SetCompatibleTextRenderingDefault(false);  
    testWin::MyForm monFormulaire;  
    Application::Run(%monFormulaire);  
}
```
